

Smothering Sensations Faint and Dizzy Spells

Those feelings of faintness; those dizzy spells; those all-gone smothering, sinking sensations which cannot be explained, and which should not go unheeded. They indicate an extremely weakened condition of the nerves and other vital organs of the body.

Those suffering in this way will find in Milburn's H. N. Pills a tonic with which to recuperate their health, build up their worn down system, and bring back their bodily vigor.

Ask your druggist for Milburn's H. & N. Pills.

Christianity And The Crisis

Much has been said and written about the economic crisis, which the people of this world have been suffering for four years with varying results. Many speeches have been made; many statements have been made; many articles have been published. In which the economists have set forth the views—but speeches, books and articles have but served to illustrate the complexity and variety of the economic crisis for all time. It has been suggested that the reason lies in the fact that the doctors have been far from unanimous in their proposed treatments and, consequently, the patients can scarcely be blamed for their hesitation to apply the cures prescribed. Despite the clash of expert opinion, however, the general public has been abundantly evidence of vitality which is the surest sign of their ultimate recovery. They have displayed a keen determination to think things over for themselves, to seek a way out of present difficulties and a way back to a prosperity which they are determined to make permanent.

Out of the best contributions to the "new expert" insight upon the crisis, the views of those constituting the best brains from post-war economic difficulties, is the series of articles recently published in a single volume under the title, "Christianity and the Crisis". The contributors are clergymen, clerical or lay, but their method of approach to the various phases of the crisis is not made from the purely theological angle. What is important is the enormous amount of practical knowledge and knowledge of their subject, and this is true whether they write of intellectual and moral confusion (which might, of course, be expected) or of social, economic and international confusion (which, on the other hand, might not have been expected). One is forced early to the conclusion that these churchmen are no mere "observers" actuated by high moral purpose but divinely inspired practical officers sent to the world to equal the masterly simplicity of the discussion of financial and monetary problems contributed by Dr. Hewlett Johnson, Dean of Canterbury. One is not surprised to learn that besides being a Doctor of Divinity, the Dean has a Ph.D.

The preface furnishes in general terms upon which the volume is based, and the thought which should be an inspiration to all who, having given serious thought to the problems of the hour, are beginning to doubt whether final solution is possible. Drawing a parallel between the years following the battle of Waterloo and the present time, the preface states:

"The year 1815 was a year of social antagonism and moral confusion, and civil disturbances more violent than anything we have known this time in England or America. Yet the religious accumulation of moral power has been so ample that the foundation of civil and religious liberty had already laid, the establishment of democracy had been slavery overthrown, and the world was at peace."

It is the belief of those who are contributing to "Christianity and the Crisis" that the same moral power is with us today, because the same religious spirit is at work—i.e., as most close observers believe, emerging now with greater strength from the confusions and dislocations of the past war.

The cause, indeed, is simple. The motives and methods of human life are not sufficiently moralized; it was to moralize the machinery of production, to limit the power of selfishness, that Wilberforce and Shaftesbury were working a century ago; but in many ways industry and business, and family life, and civic and political action, need further moralization. Money has been spent on the material aspect and treated as machinery—material, because the nation and their representatives have not yet learned the moral elements of international behavior. we stand at the moment on the brink of irretrievable disaster."

The way out then is for application of the moral teachings of Christianity in international, national, civic, business and family life according to the churchmen who, having examined the problems of the hour, discern the need and point the method.

Crime Against Youth

Great Masterpieces

**H. R. J. Manion Denounces War In
Euphoric Terms**

War is a crime, in emphatic terms by Hon. R. J. Manion, Minister of Railways and Canals, and Canada's representative at the recent disarmament conference at Geneva in an address before the Women's Canadian Club, Ottawa:

"One hundred years from today, or possibly sooner, will we be looked upon as barbarians for permitting war to exist." The minister declared. "War is a crime, and youth—the youth make the blunders and youth pays the price."

On this continent the number of persons less than 25 is innumerable between Canada and the United States, or between Canada and the United Kingdom, or indeed between the United States and the United Kingdom." Dr. Manion observed.

Something New For Dames

When the Gordon Highlanders with their swinging kilts and bagpipes and drums arrived in Copenhagen, Denmark, for the opening of the British exhibition, they attracted nearly as much attention as the Prince of Wales who opened the show. The Dames had never seen men in kilts except on the films, and the novelty aroused great interest.

Would Tag Offenders

The government should take stronger and more drastic measures to confine such a way as to bring home to him his responsibility. Fines and jail sentences seem to have no effect in reducing reckless driving. This paper again suggests that a red tag be ordered attached to every car driven by a motorist who has been drunk. —*Saint Daily Star.*

Advice to a Canadian about to visit the States: Don't take any American money.

Soviets Take Quarter Crop But Presents Allow to Sell Surplus In Private Sector

The Soviet government had been informed that collection of the 1933 grain crop from the peasantry had been completed.

At 20,000,000 to 25,000,000 metric tons were obtained, foreign observers understood, by forced purchase at fixed prices set by the administration. (The metric ton is 2,205 pounds.)

The grain amounting to about 25 per cent of the total production, will be devoted to feeding the urban population and the army, export and reserves.

In its report, addressed to Joseph Stalin, leader of the Communist party, Chairman Chayrov of the agricultural section of the council of people's commissars, pointed out that last year the Soviet government had a month to two months ahead of last year when collections were limited by a poor crop. The full quotas had been reached.

Another innovation was to allow the peasants to sell their surplus production to private markets, as contrasted with the former procedure of taking a fixed proportion of whatever was produced.

A third innovation was to allow

the peasant to sell his grain

at the price of bread, which still is

the principal item of the Russian diet, has decreased considerably recently as a result of the sale of the excess grain.

There is a special attention to

sections which this year assumed ad-

ministrative control of every admin-

istrative unit.

Hoppers In Alberta

Injects Damaged About 11 per cent Of Crop Last Year

Grainhoppers did about 11 per cent damage to the crop in Alberta last summer, but measures taken to combat them saved 44 per cent, according to information based on reports and estimates by the department of agriculture. A acre of grain, 3,625,000 acres damaged by 10,900 farmers was affected.

It is expected that there will be another visitation by hoppers next year, but possibly not so serious as last year. While the infestation affected will be larger, the infestation will not be so heavy, it is believed, and a campaign of about the same proportion as this year is aimed at.

Mr. Bennett spoke briefly, taking as his subject the development of money as legal tender from the days of barter and tokens. The address was delivered in a great hall in the city of Edmonton.

Mr. Bennett spoke briefly, taking as his subject the development of money as legal tender from the days of barter and tokens. The address was delivered in a great hall in the city of Edmonton.

No one appreciated more keenly than commercial travellers the necessity of having a stable medium of exchange for trade purposes.

Mr. Bennett said: "The history of the world is the history of money from the beginning of civilization. The world conferences had been prevented from dealing with this problem because they had not been able to agree on a complete recovery in world trade conditions.

Mr. Bennett described the functions and needs of a central bank in a country such as Canada which gravitated to the United States and dominated the world of trading nations, but did not enlarge upon this phase of the legislative program being prepared for the forthcoming session of parliament.

Fifty-six per cent of the business of the country was now being carried on by the use of paper of no intrinsic value beyond the confidence of the user. The paper money of the world is now being used in the Mediterranean services, has earned many admiring comments.

Friendship, for example, is the officer's "quid pro quo" or war chest. This is equipped with the latest trench coat, which forms seats by day, or can be folded up to give ample floor space. Each belt is fitted with lifelines and could be used as an anchor line for kid and canopied for food and crockery.

As the credit of an individual depends upon his reputation for redeeming his promises, so did the credit of a country depend upon the manner in which it fulfilled its contracts.

Mr. Bennett said: "Herbly was seen for many years.

He was a blind man, a son of a man who had

Work Of Charting Positions Of Planets To Aid Navigators Is Planned Five Years Ahead

The superintendent of the Nautical Almanac Office, at Greenwich, England, has to think five years ahead. He is now preparing his almanac for 1938.

The superintendent is Dr. L. J. Comrie, who charts the positions of the moon and stars and navigators can see them in the air throughout the world. He has already worked out the positions of the moon twice a day up to the year 2,000.

The Nautical Almanac is the seaman's Bible. The navigator wishing to determine his position must know three things:

1. Greenwich mean time (obtained from a clock which is checked by wireless);

2. The altitude of the sun or some other heavenly body (obtained by sextant); and

3. The celestial position of that body.

The Nautical Almanac provides the latter information. No ship could be navigated without it, and the accuracy of its figures the safety of all shipping depends.

The reason why Dr. Comrie has only finished his work five years ahead is that several other nations co-operate with Greenwich in collecting the information given in the almanac, and without the predictions of the daily positions of the sun, moon and stars they could not get on with their part of the work.

In recent years the methods of the department have been revolutionized by the introduction of accounting machines.

"Up to 1926," Dr. Comrie says, "practically all the computing was done by hand. Highly skilled computers, who lived on the figure boarders, were the order of the day. Today no logarithms are used. The machines do it all, even to the checking of their own figures."

In a large room young girls sit at machines, figure easily with enormous figures concerning the positions of heavenly bodies.

How old seven-figure logarithm experts would have stared at their young charge! The girls know nothing about astronomy or "right ascension" and do not need to.

The thing that matters is that one of the machines in the course of a year calculates 1,000,000,000 "annual values" involving about 30,000,000 figures. It would take a copyist, working ordinary office hours, seven years merely to copy these figures, without any calculation.

And that job already mentioned, of predicting the position of the moon up to the year 2000, which done by hand, would have cost \$30,000, was accounted for in the \$7,500 by means of another machine.

Next year marks a centenary at the Nautical Almanac Office, for although the first almanac was produced in 1766, it was the 1834 publication which became the model of all subsequent issues.

Ancient And Modern Speed

Emperor Tiberius Able To Make 200 Miles In A Day

Mr. Southgate, a sportsman, that ship speed has remained almost stationary for the past 25 years reminds a correspondent of the interesting fact that the Romans held the land speed record through the centuries and the invention of rail ways. The record was set up by the Emperor Tiberius, who in a dash through Rhentia and Germany to Lyons to see his dying brother, Drusus, acted a speed of 200 miles a day by using horses, chariots.

Even in 1834 we could not travel faster than the Romans. Sir Robert Peel was in Rome in November of that year and when he arrived he was to be seen appointed to Minister. He immediately set out for London, travelling, we are told, "regardless of expense," but the journey took him thirteen days to accomplish.

It was only the time taken by high Roman officials when sent from Rome to Duria during the "secundum omnium" war.

Forced His Point

"That came most to the performance will accomplish all things," said a passenger in a railway compartment.

"Nonense, sir!" said a fellow-passenger. "Will patience and perseverance enable you to carry water in a sieve?"

"Certainly!"

"I would like to know how!"

"I'm sorry by waiting patiently for the water to freeze."

Plans Being Laid For Program Of Works In Saskatchewan Next Spring

Comment by Premier Anderson of Saskatchewan that the Canadian Pacific, recently destroyed by fire, will be rebuilt, was undertaken as part of a program of works under a national plan, has revived hope that the program proposed some time ago by Premier Bennett will commence again.

The works program, if undertaken, Dr. Anderson said, would also include for Saskatchewan the further development of roads and erection of bridges.

Careful Storing Of Seed

Proper Care Necessary To Keep It Strong Through Years

On the whole, that is the life of the seed depends to a great extent on the care that will be given to it when collected and it gets proper care during the winter it will stay strong and vigorous. Seed should not be allowed to freeze. Seed should be stored in an attic or dry basement or stored house where temperature remains at a reasonable height.

SHOULDERS HOLD ATTENTION—
MATRONS! HERE IS A DRESS
FOR YOUR LINGERIE—
SMART!

Carried out in shiny and wet black crepe satin with a touch of white, this soft tailor-like lines will have instant appeal.

It will be developed in any of the new exquisitely soft new season's wools. The hairy weaves are equally smart.

Faithful crepe satin is another delightfully smart suggestion in combination with the new wools.

Style No. 545 is designed in sizes 32, 34, 36, 38, 40, 42 and 44 inches bust. Size 36 requires 2 1/4 yards 54-inch with 1 1/2 yard 35-inch contrast.

Price of Pattern 20 cents in stamps or coin (check is preferred). Wrap coin carefully.

Receives First Auto

Mechanical Vehicle Never Before Seen on S Al Island

History was made on Seal Island, graveyard of many a fine ship, when an old car was loaded on to Hilton Nickerson's motor boat at Yarmouth. Nickerson transported 25 miles to the island.

The car, owned by Herbert Moore, wireless operator at the government station there, could not be landed directly on the rocky island seas, so was loaded on to two dozen logs of wheels in each, and carried to shore.

The owner then drove, for the first time since creation, a mechanical vehicle over the rough seal island.

Seal Island is about four or five miles long and less than two miles wide. About 20 families live there, of whom there are fishermen. Wireless operators are on for several years and Mr. Moore, decided to buy a car. The only vehicle he could buy was not only he could not afford a car, but he had acquired several other modern mechanical aids never before seen on the island.

Egg Production Tests

Mixed Protein Rations Best For Birds Over Two Years

Tests to determine the most economical ration for the production of eggs at the Harper Adams Agricultural College, England, have resulted in no significant change in feeding fish meal instead of meat and bone meal, dried bullet meal, or peanut meal instead of soybean meal throughout the period. In this, the best egg production and margin of profit was obtained through the use of a combination of meat- and bone meal, dried skin-milk, and soybean meal.

The results in the experiments are to be expected when the sun crosses the equator about September 22 goes back at least to 1743 and is held both in England and the United States. The results are not new, however, and there is no special need for storms to occur near the autumnal equinox: on the contrary, they increase steadily in frequency from summer until mid-winter. The author of the paper, Dr. G. E. Smith, regarded as the conventional beginning of the winter or stormy season. The belief in an equinoctial gale is sometimes extended to the spring equinox, March 21, but for this there is no basis at all.

Challenge Was Accepted

Workers Make Girl's Jumpers Out Of Buttons

A black dress whose garters were zip fastened because he was too lazy to use buttons was referred to by the Marchioness of Reading at a meeting of the Personal Service League in Manchester.

She told the bishop sent an ultimatum to the league and challenged the workers to make something out of them.

"We took the garters and make a little girl's jumper with a zip fastener down the front," she added.

National Credit

Britain Has Won Confidence In Security Of Fund

The Jeremiads who no doubt attribute our favorable position to good luck rather than to good guidance. But we must not be too much taken in by the talk of those other countries which have had the hardihood to link themselves to our currency is due to one circumstance, namely, that we are not compelled to defend in the security of the British pound. Confidence does not arrive—it must be won. By pursuing a quiet, but consistent monetary policy, the Chancellor of the Exchequer, in co-operation with the financial authorities, has recovered the whole of our prestige, and in its train has come trade improvement.—Glasgow Herald.

You can guess at a man's income. The higher it is, the less his wife does for him.

Artificial Blood Has Been Used For Transfusion Purposes

"Artificial blood" is the latest medical invention.

A chemical solution of all salts contained in human blood, without its albumin, has been developed by the well-known chemist, Prof. E. Weilard, and tested by the surgeon Prof. J. G. Knoflach, in the Vienna surgical clinic.

Sixty-two patients who could not normally have received blood until a transfusion of knife or bullet wounds and other serious injuries were given this artificial solution with excellent healing and even life-saving results.

Above is a picture of the monument which is to be erected in memory

Not Recent Innovation

Canadian Farmers Have Been Practicing Co-operation Since 1885

Co-operation among farmers is by no means a recent innovation in Canada. There is a co-operative dairy in Prince Edward Island, the Stanley Dairy Company, which was incorporated 25 years ago.

The company has been manufacturing cheese and butter, and conducting a business on the co-operative plan. In the last twelve years five more co-operative cheese factories, which are affiliated with the Kensington Dairying Association, commenced business and by 1910 there were 11 co-operative dairy factories on the island.

Business has been well developed, and by 1910 there were 11 co-operative dairy factories on the island.

Seal Island is about four or five miles long and less than two miles wide. About 20 families live there, of whom there are fishermen.

Wireless operators are on for several years and Mr. Moore, decided to buy a car. The only vehicle he could buy was not only he could not afford a car, but he had acquired several other modern mechanical aids never before seen on the island.

WORLD HAPPENINGS
BRIEFLY TOLD

The Soviet government was informed of the collection of the 1933 grain crop from the peasants and had been completed.

General Victor Vujicic's "black squadron" of 28 army biplanes has triumphantly completed a 16,000 m² m² of the Soviet Union's 40,000 m² possible.

Construction of a lumber mill near the mouth of the Smassas river at Port Aherne, B.C., involving an expenditure of approximately \$200,000 is planned for early next year.

Proposed legislation relating to credit and finance under the jurisdiction of the Dominion parliament will be proposed at the coming session by William T. Lucas, U.F.A. member for Camrose, Alta.

The Minister of Finance, in a secret session attended by Gen. Maxime Wiegand and former premier Edouard Duplacier, decided they were daily opposed to a rearmament of Germany.

Women have demanded in emphatic terms by Gen. R. J. Marion, minister of railways and canals, and Canada's representative at the recent disarmament conference at Geneva, in an address before the Women's Canadian club in Ottawa.

Women in the pulp and paper industry of Alberta face the possibility of a "25 per cent crop" unless precautions are taken against the grasshopper menace, Roy E. Smith, superintendent of the Gulf Lake experimental farm, told the members of the Calgary board of trade.

A prediction that Great Britain, with a deep water route through the St. Lawrence Seaway, will revolutionize world shipping and transportation facilities of the United States, was made by Judge W. E. Woolard, president of the New York State Waterways association.

A new industry, of value to Prince George, has been established in the timber industry of British Columbia, is believed to be opening with the receipt by M. M. Connell of Fraser Lake, of an order for 1,000,000 feet of poplar logs. The logs are destined for China where they will be used in the manufacture of matches.

War Water For Hens

Birds Will Conserve More Than What It Is Told

Water is one of the essentials for good egg production. Layers should therefore be encouraged to drink water by means of water tanks, fountains, and so on, to prevent them from having to come to a standstill and, that the water is never allowed to freeze. Winter slumps are often the result of the water supply being cut off by freezing. If the water is not so readily consumed as water that has had the chill taken off, birds will come from 20 to 30 per cent more water than they do when the water is warmed. There are various kinds of devices on the market that may be obtained for warming the drinking water; some are electrical and others use oil as fuel.

British Definition Upheld

Co-Discovery of Insulin Says It Is a Chemical

The British Government is right in defining insulin as a chemical and in laying an ad valorem duty of 33 1/3 per cent instead of the prevailing rate of ten per cent on importations of insulin into the British Isles," states Dr. C. H. Best, professor of physiology and director of research, and Dr. Fred Banting, co-discoverer of insulin.

"A certain Toronto newspaper has quoted us without authority as saying that insulin is an animal substance and should not be taxed. We were able to connect this misrepresentation, for as we regard it, insulin is a chemical compound."

Outline Welfare Act

That law Mother's Allowance Act of Ontario might be adjusted for a widow with one child, was suggested by Hon. W. G. Martin in the course of an address before the Women's Welfare Council at Toronto. He declared that Ontario's child welfare acts served as "an object lesson and model for the rest of the world."

Police men of Manchester, England, are to have their "depression cut" restored.

Railroads in Czechoslovakia are better than a year ago.

Scotland expects an unusually severe winter.

An Up-To-Date King

King Zog of Albania has introduced many Western ideas

King Zog of Albania is the youngest king in Europe and the most energetic. Electric lighting, telephone services and air transport have taken root. In 1930 he has imposed a creditable veneer of Western civilization on a once savage and semi-Oriental people. He used to smoke heavily—sometimes more than a pack a day—but when he got interested in health he gave up the habit on the advice of Dr. Bauer, in Vienna, where he went for a cure.

Keeping Cream Sweet

Experiments have shown that cream, cooled to 55 degrees F. soon after skimming, remained sweet to the taste for 30 hours, or long enough for delivery to the creamery in the case of a long distance. Temperature of 55 degrees F. can be secured if an insulated tank is used. If this temperature can not be secured with water alone, ice should be used. Dominion Dairy and Cold Storage Branch.

Larger Military Budget

An increase of \$20,000,000 in the military budget of Switzerland has been agreed upon as a contribution to the defense of the country. In Berlin, in which the Swiss army divisions took part, the new appropriations will be used to strengthen the Swiss air arm service and to provide new rifles.

Sign of The Times

Life Insurance Figures Good Index of Economic Conditions

Certain aspects of life insurance are a fairly good index of economic conditions. These aspects are (1) the production of new business, (2) the borrowing of money on policies, and (3) the repayment of loans on policies.

According to a statement published by the Toronto Mail and Empire, there has been a steady increase in the volume of new business written during the past two or three years. There has been in the same period a decrease in the number and amount of new loans applied for on policies. And there has been a large increase in the repayment of sums borrowed on insurance during the past two or three years.

This we may take it, is a fairly good sign of the times. Nor is it the only convincing sign of returning better times—Ottawa Journal.

Seek Tomb Of Alexander

Howard Carter Trying To Raise Necessary Funds For Venture

Enthusiastic over his proposed expedition to find the tomb of Alexander the Great, Carter has now reached the cover of the tomb of Tut-Ank-Amen has arrived in Alexandria, Egypt, to raise the necessary \$20,000 for the venture. Should Alexander's tomb be found, Carter said, it would be the most important archaeological find ever made in Egypt, even more important than the Tut-Ank-Amen discovery. The contents of Alexander's tomb, he said, he believes would consist mainly of material whose intrinsic value would not be as great as that of Tut-Ank-Amen relics. There is the possibility, he added, that Alexander's tomb has been taken over by the sea. The system he would use in searching for the tomb he described as "sondage," or sifting of pipes.

Fallacy Of Infation

Deceiving Social Value of Paper Does Not Benefit Money

Those who do not already realize it should be made to understand that there is no more vicious illusion in the world than the illusion that a nation's wealth is measured by the amount of paper it has in its vaults.

Occasional Wife?

EDNA ROSE WEBSTER
Author of "Joretta,"
"Lipstick Girl," etc.

SYNOPSIS

Camilla Hoyt, young and beautiful art student, falls in love with a struggling sculptor, Fall in love and marry secretly, deciding to live apart until Fall can make a living for himself. Camilla, the adopted daughter of a rich, kindly parson, is not an honest man, but she is not a bad girl. She is preparing herself for life with a certain amount of tact, but she is not going to get a job to enable her to support herself. She has been making the rounds of the art studios, looking for a studio with which she hopes to win a scholarship. She has been getting a call from a beautiful model, Sylvia Todd, who offers to work for almost nothing. She has been offered a place to live without her, Avis Wayne, one of Camilla's friends, is in love with Peter. Peter, however, is in love with Camilla and Terry Wayne drives into town to get Peter for a party. Peter, too, is in love with Camilla. Peter is also employed by Gus Matson, his former room-mate, who once tried to get him to go into business with whom Peter had quarreled. Peter has been working in his place for the exhibit and Avis arrives to take Peter to the party. He is in a bind, being without money, slipped away to a nearby pawn shop for a few minutes to get out of it.

(Now Go On With The Story)

CHAPTER XXIII.

"How much for that?" demanded Peter, laying his upon the scratched counter, over which innumerable hands had passed from despised and rejected hands.

The little bearded proprietor squinted up rear-glassed at Peter's towering height. He cleared his throat doubtfully and stepped up to the watch with his trembling hands.

"Oh, it's a good one," Peter encouraged. "I bought it in more than times when I was young and giddy." "Sure you are, young and giddy," said the little man, and stepped up to the watch with a twinkle.

"That may be," Peter agreed. "But I need all you can give me. I'll be back for the watch next Wednesday."

"Uhm. That's what they all say. Five dollars," was the brisk ultimatum.

"Oh, say listen, man. I have to have it now!"

"If it was a hip flask I could give you more. Nobody cares what time it is these days," he spread his hands and shrugged his shoulders with elaborate boredom.

"I'll have to watch a point this time and even it upon some fellow who doesn't need it as much as I do."

"Everybody thinks he needs money worse than anyone else," immovably.

"All right, I'll take the watch back. I may need it worse than the money after all," carelessly.

The man rubbed his fingers over his chin and waited. If it was in the case and hidden, if it wasn't. Finally, he took down the price tag. "I'll never get that for it if you don't show up to claim it."

"Don't worry, I'll be back," Peter assured him, and after he faced the floor of the dusty shop with impatience, while the owner probed the money and the claim check.

What tragic needs and heartaches the old collection of objects represented.

Peter felt woefully depressed in their surroundings.

DENICOTE A CIGARETTE HOLDER

DENICOTE Cigarette Holder absorbs the nicotine, pyridine, ammonia and resinous and tarry substances found in tobacco smoke.

Complaints holder with rollers — \$1.00 postpaid, or from your Drugist or Tobacconist. Dealers wanted everywhere.

The car had stopped on the dusty deck in the center of the store. "Hope you have a good time with the girl," he remarked with a twinkle, as he handed the ticket and the two dollars to Peter.

He grimed appreciation of his short conjecture. "How'd you know?"

"Well, men mostly hook their passions for three or four reasons. They're hungry, or want liquor, or want to show off, or want to show off. I guess you're a bit of a show-off. You aren't hungry, you're not drunk and you look too happy to have family troubles, so again, he spreads his hands and smiles suggestively.

"Sorry, Terry. I'll be seeing you later," Peter called, hurrying out the door. Ten dollars was a motley of what he needed, but it was better than nothing. His spirits were high, his appetite was good, and for the first time he recited in the thought of being near Camilla for almost two days. It was a good thought, but, that was all he could be sure of. He had to wait for the participants of the house party to know. Retracing his steps by the labyrinthian ways by which he had reached the shop, he joined the three and then, as they were finishing their meal, he told them their spending way across the park and out the boulevard which followed along the lake shore.

The man with whom he had been conversing with was a friend of Peter's, a man who responded with exuberant spirits.

"So you're working for the exhibitor, I hear," she remarked confidentially.

"I'm not working for him, but I was carrying on with him in fact. I said nothing because I know about it. I'm dying to see it, though. Peter, May I run in somewhere alone?" he cooed.

"I'm not running much to see, yet," he cooed. "I'll have to work faster if I finish in time. That's why I shouldn't be running away to play like this."

"Starved," thought Camilla. "He has no idea what the word means. And I wonder what he thinks he does to deserve it. I can't wait for this time," Cathie insisted. "Remember, this is no stag game. You're playing with girls."

"Okay," agreed Peter. "Make it ten dollars. I'll pay for the meal. Come on, Avis."

For the second time that day, panic seized Peter. He had leaped neatly from the electric grid into the furnace to make the metaphor modern. He could not play for ten cents, but he had to pay ten dollars in his pocket. Besides, he was no champion at the game, having deviated practically no time to it as compared with those players who played for hours of every day and night.

To be continued.

They had to stop the boat. Peter cast the line and the passing of a motor boat, within, and a speed boat through the slip into the lake. "Come on, everyone," she called, "we're going to crash into the setting sun. No speed limit and no rules."

When they were several miles out, Camilla stopped the motor and they dined and swam about for awhile like necking seals around an island rock.

Peter managed once to be with Camilla alone for a few minutes, clinging to the rods along the side of the boat as they talked. "What's the idea of Terry seeing a famous?" he smiled.

"Sorry, Peter, but we have to play the game, now that we've started. I'm not going to win. It makes me laugh the way we're acting. I'll be over on Avis, though," she chuckled. "She always was a cat, so I don't mind scratting a little. If she were anyone else, I'd feel sorry for her."

"But—Ca—" he began, when they were interrupted with the decision that everyone wanted to go ashore. The boat was a two-cylinder open boat, so the beatiful waves, shouts and laughter, and splashing water made pandemonium for a short time, then, they soon sank warily into swings and chairs on the screen of verandas to await dinner. Seconds later, the meal was served on a platform, rubbery, but neatly.

"How much?" Cathie asked, "penny a plate?"

"Thirty-five," scoffed Warren Selby. "Better make it a dollar. I have to get back that two hundred I lost to Terry the other night. The old man won't give me allowance till it's paid off."

"Starved," thought Camilla. "He has no idea what the word means. And I wonder what he thinks he does to deserve it. I can't wait for this time," Cathie insisted. "Remember, this is no stag game. You're playing with girls."

"Okay," agreed Peter. "Make it ten dollars. I'll pay for the meal. Come on, Avis."

For the second time that day, panic seized Peter. He had leaped neatly from the electric grid into the furnace to make the metaphor modern. He could not play for ten cents, but he had to pay ten dollars in his pocket. Besides, he was no champion at the game, having deviated practically no time to it as compared with those players who played for hours of every day and night.

To be continued.

Old Legend Shattered

Cow Bay Not Named After Old Settler's Boy

Origin of the name given Cow Bay, Cape Breton, was recently disputed, but old legend that for years has surrounded it has been shattered.

Evidence disproving the old story that the bay was named after John Meloney's boyhood was submitted to the Nova Scotia legislature by Prime Minister R. B. Bennett.

"There is a very urgent demand for the general recognition of the fact that the bay is not named after the old settler's boy," said the Hon. C. W. F. Eggen and E. T. McKeen, recognizing historians. The recognition of what in reality was the laying of the foundation of western civilization in this country."

Europe Buying Apples

Canadian Growers Get Better Prices From Purchasers on Continent

With much better prices being received in the markets on the European continent, Annapolis Valley apple shippers have scheduled a market conference in London, Ontario, on April 10.

A plot of the fruit on the English market set prices to low levels and already several cargoes have gone forward to Rotterdam, the fruit being destined largely for continental points.

Agriculture in England now employs 715,100 people, an increase of 17,000 a year.

France hopes to get \$4,000,000 from taxes on lotteries this year.

Paying a man what you owe him is a good way to get even with him.

British Insurance

Britain's 47,000,000 people held life insurance worth \$51,702,025 of the \$100,000,000 worth of policies just issued by the Industrial Assurance Commissioner. Policies numbered 63,946,191, an increase of nearly 2,000,000 over 1930. Claims cost the companies \$14,500,000.

British Insurance

Everything was slight, so long as others were not involved. But there was Sylvia, and now Avis, and there was Terry before him, smiling merrily, and he had no doubt at all that it was his wife who rode in front of them with Terry. He resolved that something would have to be done about this situation. He must get Camilla away from the place of marriage, even though they continued to live apart. He had not favored the idea of separation from the beginning, but he appreciated Camilla's attitude.

Everything was slight, so long as others were not involved. But there was Sylvia, and now Avis, and there was Terry before him, smiling merrily, and he had no doubt at all that it was his wife who was planning for his. He would get Camilla to announce the surprise this evening.

But he had no opportunity to talk with her, and he was unable to talk with her. As soon as they arrived at the cottage, there were cocktails and then everyone returned to the beach and the water.

The disappearance of the others, Camilla, dived another series for Peter's benefit. He was amazed at her skill. Modest little thing, he thought, who never boasted of what she could do. And she could do so many things well. She was so wonderful that he didn't deserve her.

She swam ashore after the somer-

JAPANESE MINISTER TO CANADA

Hon. Ieyama Tokugawa, Japanese Minister to Canada who made a recent visit to Washington.

Chapel Built of Logs

Novel Architecture Used in Building at Cowichan, B.C.

Of timber, the structure yet fitting in with the fine background, the new Queen Margaret's school, built at Cowichan is a monument to the generosity and loyalty of present and former members of the school.

It is a log structure, but instead of the usual manner of construction, in which round logs are made to fit at the corners, they are fitted by a system of dihnotches, which are inverted when the logs are in place, and allow for expansion and settling. The idea of using this style of architecture came from C. Stone, who also arranged the drift-bolt system with which timber is joined together in the chapel.

He went to the trouble of erecting a piece of wood at Hillcrest for demonstration.

The building is 20 feet by 60 feet, exclusive of the vestry, and will accommodate 100 people. The bell tower is 25 feet above the ground and the top of the wall 16 feet. The material came from Hillcrest, the timber specially cut timbers, which were rounded and grooved for the cable ends. Douglas Jones was the architect and O. C. Brown the contractor.

Well done good and faithful servant: thou hast been faithful over a few things: I will make thee ruler over many nations.

—Matthew 25:23.

Our hearts, our strength, our will to Thee.

Then even lowliest work of Thine, Most noble, blest, and sweet will be.

—M. Kimball.

Nothing is too little to be ordered for the Kingdom of God, too little in which to see His hand, nothing which touches our souls too little to accept from Him, nothing too little to be done by Him.

A son received with great ideas and great scoffed Warren Selby. Better make it a dollar. I have to get back that two hundred I lost to Terry the other night. The old man won't give me allowance till it's paid off.

"Starved," thought Camilla. "He has no idea what the word means. And I wonder what he thinks he does to deserve it. I can't wait for this time," Cathie insisted. "Remember, this is no stag game. You're playing with girls."

For the second time that day, panic seized Peter. He had leaped neatly from the electric grid into the furnace to make the metaphor modern. He could not play for ten cents, but he had to pay ten dollars in his pocket. Besides, he was no champion at the game, having deviated practically no time to it as compared with those players who played for hours of every day and night.

To be continued.

YOU AND I

Who are they whom labor brings
Boots too blessed to deny,
Tearing on with heart that sings?

You and I!

Who are they who seek and gain
Tender heart and seeing eye
As the rich rewards of eye?

You and I!

Who are they who often find
All the days so dry, so dry, so dry,

With a heart so full of life, so kind?

You and I!

Who are they who seek and gain
Tender heart and seeing eye
As the rich rewards of eye?

You and I!

Can Choose For Itself

Irish Free State to Break With Britain

The Irish Free State is a republic if not by name, its claim to independence having been acknowledged by Britain in the Anglo-Irish Treaty of 1921.

The British government has nothing to do with the affairs of the Free State, but the Free State has nothing to do with the affairs of Britain.

The Free State is to be allowed to take itself outside the British Empire to the extent that it wishes to take itself out of the only way of doing business with the Free State for the British government to invite the Free State all the way out.

If the Irish Free State wishes to have no political association with Britain, it will have the right to do so.

That will be the basis of the Free State, not the loss of Britain or of the British Commonwealth. The decision is of its own choosing. The economic consequences of such a severance will be its own responsibility.

TOWN & COUNTY Personalographs

LOST — On the road, running north from the Anglican Church one day, a roll containing plain and socket wrench suitable for Ford car. Will find please leave at Chronicle office. Reward, Wm. McNeil, Carbon.

I wish to express my appreciation to the F.O.D.R. for the lovely humor received at Christmas time—E. G. Birberman.

Hugh MacDonald returned to Carbon on Sunday night after spending a week at his home in Medicine Hat.

Miss Kathleen Watkins, of the Bush of Montreal, has taken a couple of months leave from her duties and left on Saturday for her home in Carbon.

The Carbon hockey team returned to The-e Hills on Friday last and in their second game in the league lost to the team of that town by a 5-3 score.

A large crowd attended the dance in the Farmers' Exchange hall on Friday last, music being furnished by McLean's orchestra of Rockford.

Miss Helen Alexander is visiting with her sister, Miss Clarence Hay.

Mrs. W. Poxon was a business visitor to Carbon on Tuesday.

Miss Olive Charlebois remained at her school at Redlands on Tuesday night after spending the Christmas holidays at her home near Carbon.

CHRIST CHURCH, CARBON

Services will be held as follows: 1st Sunday in month—Morning Prayer and Holy Communion. 3rd Sunday—Morning Prayer. 1st and 4th Sundays—Evening service. 5th Sunday—by arrangement. SUNDAY SCHOOL: Every Sunday morning at 10 o'clock.

REV. J. R. DAVIES

Mrs. Winters and daughter returned to Carbon on Sunday of this week.

There will be a hockey game in Carbon tomorrow (Friday) night, when the senior team meet Carbon in the first home game of the season. Turn out and support the local team. The admission charge is only 25¢.

Miss Lillian Gordon of Stavely spent a couple of days visiting in town with her sister, Miss Letta Gordon.

Gordon Ramsay returned to the University of Alberta the first of the week, after spending the holidays at his home in Carbon.

A local bonspiel was held on New Year's day and many interesting curling games were played.

Miss Mollie Mathon returned to her home in Drumheller on Tuesday after spending the holidays at her home in Carbon.

The New Year in Carbon was ushered in with little noise and merry making. The streets were the scene of a great deal of fun and the commencement of the new, but the weather was too cold to permit merry makers from venturing forth into the night.

THE CHRONICLE

Here and There

Twenty-nine men and seven women who pioneered Alberta trails died in the present year. All of them saw the west when it was first opened up and settled before 1885. The current year marks the half century since the Canadian Pacific was built.

Sailing for New York December 14, the 42,500-ton white-hulled Empress of Britain left on a Christmas day New Year's day cruise for the Far Indies, December 22, returning to New York January 4, sailing again January 14 for a 14-month cruise around the world.

Among the "Believe It or Not" facts well known to the general public, the following may be added: the statement of S. G. Hibben, of the Westinghouse Light Company, that the 10,000 guests at the Royal York Hotel, Toronto, that "today there are more than 100 different kinds of artificial light sources."

Approximately 75,000 people own the Canadian Pacific Railway through their ownership of 12,000 shares of company stock. Of these, 36,000 live in Canada. Of the 12,000 shareholders in the various parts of the British Empire, mostly in England, with 16,000 in other countries, mostly continental Europe.

For the first time in western Canada, an impressive ceremony, the first in the New Year, was held at the Hotel Vancouver, Vancouver, B. C., on December 31. The Columbians were admitted by King George, sovereign head of the Commonwealth. Old world costumes and strange rites added to the dignity and color of the proceedings.

Trade, ways and their important functions in the economic existence of the State were stressed by Hon. H. B. J. Mairion, minister of railways and canals, at a national conference held at Ottawa recently. They had, he said, contributed materially to developing the country, to the building up of industries and in promoting land settlement and agriculture.

Railway and motor truck transportation are both essential to the economic well-being of Canada and neither should be neglected, said Hon. H. B. J. Mairion, minister of railways and canals, at a national conference held at Ottawa recently. But, he added, while railroads have been instrumental in building up of industries and in promoting land settlement and agriculture.

Counter Sales Books HALF PRICE

A price war is on in Counter Check Books and you can now procure books at just one-half the former price.

These prices cannot last for long, as they are far below the cost of manufacture—so stock up.

As an example, 500 No. 3 Carbon Leaf books now cost only \$12.50. The former price was \$25.00 (plus sales tax).

125 Carbon Leaf Books cost \$5.00 (plus sales tax).
